

National Environmental Public Health Tracking Week is July 10th-14th!

Join us in celebrating National Environmental Public Health Tracking Week! Learn what we do, explore our resources and follow us on [Twitter](#) and [Facebook](#) to stay up-to-date on all the week's activities. Daily themes will highlight different environmental health topics on the Tracking Network:

- Monday, July 10: Children's Environmental Health
- Tuesday, July 11: Asthma
- Wednesday, July 12: Extreme Heat
- Thursday, July 13: Radon
- Friday, July 14: Chronic Disease

Perfluorochemical (PFC) Blood Testing and Community Exposure Update

New testing data available on Pease and Southern NH; MVD coming soon!

Blood testing for perfluorochemicals (PFCs) is wrapping up for people exposed via drinking water at Pease, the Merrimack Village District (MVD) water system, and

private wells in Southern New Hampshire. The Pease and Southern NH dashboards were recently updated with the latest testing results. A dashboard for the MVD blood testing program will be coming this fall. [Access PFC data.](#)

WISDOM
Connecting NH to Health Data

- Hundreds of health-related indicators
- Customizable reports, charts, and maps
- Easy-to-use web-based application
